

SPECIFICATIONS FOR REFOND SURFACE MOUNT LED

Model: RF-W4S118TS-A61

Company Name:

Confirmed By Customer:

DATE:

深圳市瑞豐光電子有限公司

SHENZHEN REFOND OPTOELECTRONICS CO.,LTD.

深圳市南山区松白路百旺信工业园二区第6栋 6th wing,2rd Second block of Baiwangxin Industry park Songbai Road,Nanshan District ShenZhen,China,P.C:518108

TEL:0755-29675000 FAX:0755-29675111 http://www.refond.com

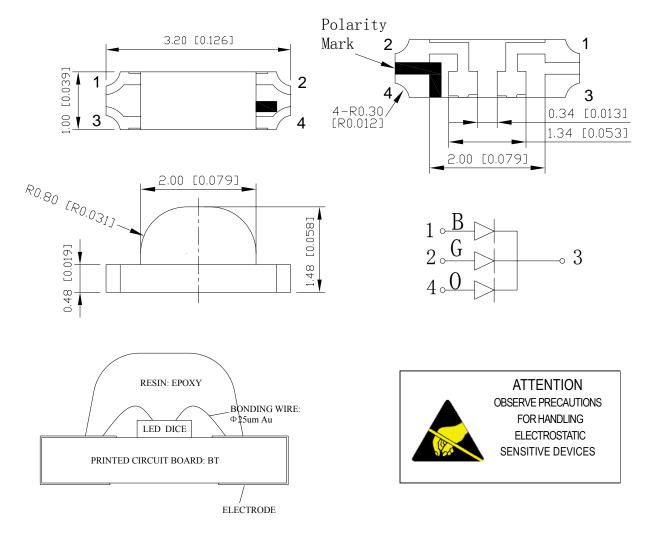

·創新科技 豐富人類生活 ·····

. . .

Feature

- Viewing angle:160 deg
- The materials of the LED dice is InGaN, AlGaInP
- 3.2mm×1.0mm×1.48mm SMT-LED
- RoHS compliant lead-free soldering compatible

Package Outline

NOTES:

- 1. All dimensions are in millimeters (inches);
- 2. Tolerances are ± 0.1 mm (0.004inch) unless otherwise noted.

Relative Intensity vs. Ambient Temperature

Derating

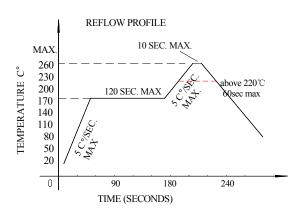

Reflow profile

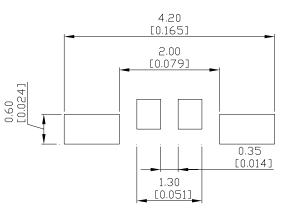

- Soldering condition
 - Recommended soldering conditions

Reflow Soldering		Hand Soldering		
Pre-heat	160∼180°C	Temperature	300°С Мах.	
Pre-heat time	120 seconds Max.			
Peak temperature	260 ℃ Max.	Soldering time	3 second Max.	
Soldering time	10 seconds Max.		(one time only)	
Condition	Refer to Temperature-profile			

- After reflow soldering rapid cooling should be avoided
- Temperature-profile (Surface of circuit board) Use the following conditions shown in the figure.

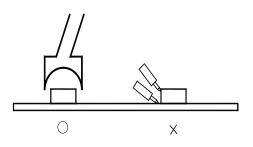

RECOMMEND PAD DESIGN (Units: mm)

- 1. Reflow soldering should not be done more than two times
- 2. When soldering ,do not put stress on the LEDs during heating
- Soldering iron
 - 1. When hand soldering, keep the temperature of the iron under 300°C, and at that temperature keep the time under 3 sec.
 - 2. The hand soldering should be done only a time
 - 3. The basic spec is <5 sec. when the temperature of 260 °C, do not contact the resin when hand soldering

Rework

- 1. Customer must finish rework within 5 sec under 260 $^\circ\!\mathrm{C}$
- 2. The head of iron can not touch the resin
- 3. Twin-head type is preferred.

Packaging Specifications

• Feeding Direction

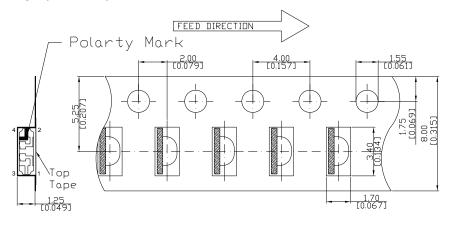

• Dimensions of Reel (Unit: mm)

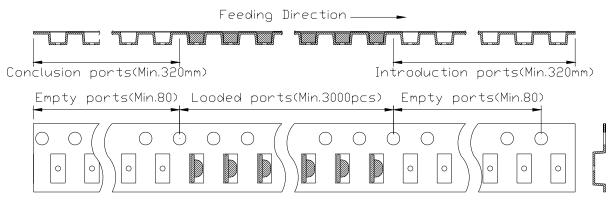

А	8.0±0.1mm
В	$178\pm1mm$
С	60 ± 1 mm
D	13.0±0.5mm

• Dimensions of Tape (Unit: mm)

• Arrangement of Tape

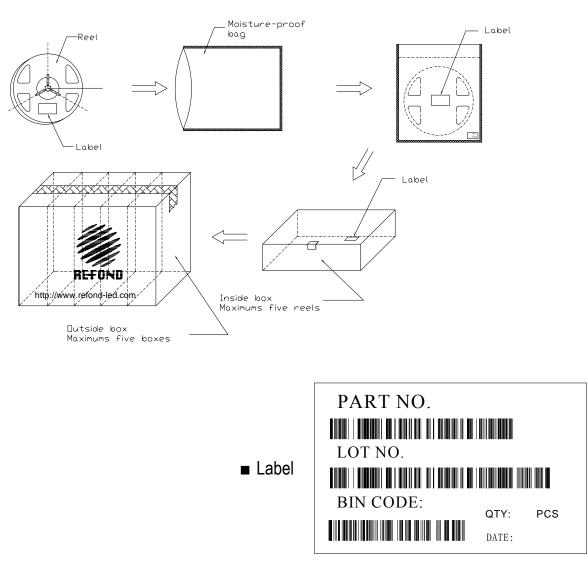

NOTES

- 1. Empty component pockets are sealed with top cover tape;
- 2. The maximum number of missing lamps is two; 3. 3,000 pcs/ Reel.

Packaging specifications

CAUTIONS

Package specifications

Reeled products (numbers of products are 3,000pcs) packed in a seal off moisture-proof bag along with a desiccant one by one, Five moisture-proof bag of maximums (total maximum number of products are 15,000pcs) packed in an inside box (size: about 250mm x about 250 x about 68mm) and Five inside boxes of maximums are put the outside box (size: about 360mm x about 265mm x about 255mm) Together with buffer material, and it is packed. (Pare No., Lot No., quantity should appear on the label on the moisture-proof bag, part No. And quantity should appear on the label on the cardboard box.) The number of the loading steps of outside box (cardboard box) has three steps.

Storage conditions

Before opening the package:

The LEDs should be kept at 30° C or less and 90%RH or less. The LEDs should be used within a year. When storing the LEDs, moisture proof packaging with absorbent material (silica gel) is recommended.

After opening the package:

The LEDs should be kept at 30 °C or less and 70%RH or less. The LEDs should be soldered within 168 hours (7days) after opening the package. If unused LEDs remain, they should be stored in moisture proof packages, such as sealed containers with packages of moisture absorbent material (silica gel). It is also recommended to return the LEDs to the original moisture proof bag and to reseal the moisture proof bag again.
